DETAILED ACTION

1 The amendments to the specification and the claims in the preliminary amendment filed 4/15/99 as paper #2 has been entered, however, the amendments to the figures have not been entered because the applicants are the only one to amend the figures.

Election/Restriction

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: melanoma

Species B: neuroblastoma

Species C: glioma

Species D: sarcoma

Species E: small cell lung cancer.

The species are distinct because: Melanoma typically occurs in the skin and involves proliferation of cells at the dermal-epidermal junction, neuroblastoma is characterized by immature nerve cells of embryonic type, glioma is characterized by any neoplasm derived from cells of the brain and spinal cord, sarcoma is characterized by a connective tissue neoplasm

Art Unit: 1642

formed by proliferating mesodermal cells, and small cell lung cancer is characterized by a pulmonary neoplasm that grows rapidly and metastasize early.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 62, 68-76, and 82-89 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
